It's a funny story: I bought this game almost by mistake, thinking that it have an English translation - I couldn't read a single line of a text, and still I liked it a lot!

Instead of Chinese text (which I'm able to translate via Google Translator) the game shows me messages written in white blocks (I tried to do different things both to fonts and to my Windows, nothing helped). Still, I played "The Monster" for a hour and a half - I just interacted with everything and used the enigmatic items in my inventory on everything, including doors. It was intriguing nevertheless, like decoding a puzzle with unknown rules. This game definitely have an atmosphere, and its horror vibe is relying not on screamers, but on stylish dark RPG Maker VX visuals and clever level design.

For now I'm stuck presumable in the middle of the game, trying to use the items from my inventory on everything I see, in desperate need of walkthrough (no matter on which language, thanks to the Google Translator). I found the second savepoint, but I have no clue what do I have in my inventory and where should I use this items. Alas, there is no YouTube letsplay videos on "The Monster", so I can't see what to do for myself.

Despite everything, even if I still can only theorize about the plot of this game on the basis of the scenes I saw and Steam comments, and even if I'm stuck in the middle, I still recommend "The Monster" as one of the most atmospheric RPG Maker VX/VX Ace horror games that I saw. It's not trying to scare you with cheap jumpscares (I still found none of them), but it creates a tension that rises in proportion to your passing through the house. On the other hand, it requires you to know the language and to have a respective setting of your operation system in case you want to understand what's happening and what do you need to do first-hand. I sincerely hope that one day there will be either a text/video walkthrough for "The Monster" or the official English translation of it from Ocube, so I can finish it at last. I don't want to drop this game when I'm stuck, and for me it's a sign of a well-made project.
